Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1: Fig. 4 is directed to an embodiment of the invention, a microscopic imaging system.

Species 2: Fig. 5a is directed to another embodiment of the invention, a microscopic imaging system with wavelength selection device after the light source.

Species 3: Fig. 5b is directed to another embodiment of the invention, a microscopic imaging system with a wavelength modulation device after the light source.

Species 4: Fig. 5c is directed to another embodiment of the invention, a microscopic imaging system with a wavelength selection device before the camera.

Species 5: Fig. 5d is directed to another embodiment of the invention, a microscopic imaging system with a wavelength modulation device before the camera.

Species 6: Fig. 5f is directed to another embodiment of the invention, a discrete channel optical system.

Species 7: Fig. 6 is directed to another embodiment of the invention, a microscopic imaging system at an oblique angle to the sample surface.

Species 8: Fig. 7 is directed to another embodiment of the invention, a simultaneous, multiple angle of incidence ellipsometer.

Species 9: Fig. 8 is directed to another embodiment of the invention, spectroscopic scatterometer system comprising a spectroscopic ellipsometer and a spectroscopic reflectometer.

Species 10: Figs. 11d-11f, 13a-13d is directed to another embodiment of the invention, a combinational imaging and spectrometry system.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, **claims 1 and 38-42** are generic to all species. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Fax/Telephone Numbers

If the applicant wishes to send a fax dealing with either a proposed amendment or a discussion with a phone interview, then the fax should:

1) Contain either a statement "DRAFT" or "PROPOSED AMENDMENT" on the fax cover sheet; and

2) Should be unsigned by the attorney or agent.

This will ensure that it will not be entered into the case and will be forwarded to the examiner as quickly as possible.

Papers related to the application may be submitted to Group 2800 by Fax transmission. Papers should be faxed to Group 2800 via the PTO Fax machine located in Crystal Plaza 4. The form of such papers must conform to the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CP4 Fax Machine number is: (571) 273-8300
